

Commercial Pilot License

The Commercial Pilot License (CPL) allows the holder to fly for hire or reward in a Canadian Commercial Air Service. This opens the door to a career as a commercial pilot, as you work your way towards becoming an airline pilot, charter pilot, medevac pilot, pipeline surveying pilot or forest fire suppression pilot, among many other flying positions.

To hold this license a person must have reached 18 years of age, obtain a Private Pilot License (PPL) and hold a Category 1 medical certificate.

Ground School & Flight Training Summary

Aircraft	Cessna 172, ALSIM Flight Training Device	
Ground School	200 HOURS	\$1500.00
	Books and Study Material	\$1000.00
25 hours dual instruction on C172 @ \$275.00 / hour		\$6875.00
30 hours solo flight time \$190.00 / hour		\$5700.00
10 hours on ALSIM Flight Training Device		\$1800.00
70 Hours Solo Building as Pilot in Command and/or Cross country flying @\$190.00 / hour		\$13,300.00

Approximate Course Total \$30,175.00

For more information on Transport Canada’s minimum requirements to obtain a Commercial Pilot License, [see the Canadian Aviation Regulations](#).

Additional Costs

Medical Examination average cost: Examination is the responsibility of the student	\$250.00
Preparatory Ground Instruction (Optional)	\$65.00 / hour
Flight Test, Transport Canada Licensing Fees and Examination approximate fees	\$1040.00

We believe in high quality training and transparency. We quote a realistic estimate for the cost of training, rather than just the minimum hours stated by Transport Canada.

Actual cost will vary depending on student ability and study skills.
